Squad Kit for Comps only • If you are unsure on the equipment size required, your coach will be happy to advise prior to ordering

Order TOTAL **£**

Guide to measuring apparatus

Hoop should be at hip bone height

HOOP

STEP 1 Either hold the hoop and have it meet your hip bone
Or

STEP 2 Have a friend or parents measure from your hip bone down to the floor to help you choose your size

CLUBS

STEP 1 The rule for clubs is that it that the top of the club should not extend beyond the gymnasts mid-bicep when held.

Ribbon length is based on gymnast size and 'level'

Measure total length of rope from armpit to armpit and remember to allow extra rope length for knots.

ROPE

STEP 1 Tie a knot or a double knot at one end

STEP 2 Stand on the rope slightly off the middle to have the knots meet at the armpit

STEP 3 Make knots on the other side
